INSTALLATION OPERATION INSTRUCTIONS

WARNING— Before starting the installation, disconnect the power by turning off the circuit. Turning the power off using the light switch is not sufficient.

1. If you are replacing an existing fixture, disconnect and remove the old fixture. Expose the supply wiring from the outlet box.
2. Raise fixture back chassis plate(B) to mounting location and run supply wires through Mtg bracket.
3. Make electrical connections: Connect grounding wire (green or bare copper) from the supply circuit to the green colored wire from the fixture. Connect the white wire(s) from the supply to the white wire of the supply circuit. Connect the black wire(s) from the fixture to the black or supply wire of the supply circuit. Use UL Listed wire connectors (by others). Secure wire connectors with UL Listed electrical tape (by others).
4. Place the MTG. Bracket (A) onto the Outlet Box. Insuring that all wires are free and not pinched.
5. Install and tighten (2) 8-32 screw (provided) for the Mounting Bracket.
6. Attach Assy (B) to the Nipple and tighten with Cap Brass (C) (provided).
7. Install lamps (by others) do not exceed recommended wattage.
8. Install Assy (D) and tighten (2) 8-32 screws (E) (provided) as shown in figure.
19. Restore power.
