

INSTALLATION OPERATION INSTRUCTIONS

WARNING— Before starting the installation, disconnect the power by turning off the circuit
Turning the power off using the light switch is not sufficient

1. To install the Fixture, Expose the supply wiring from the Outlet Box.
2. Run the supply wiring thru the center hole of the Back Plate (A)
3. Screw the Back Plate (A) onto the Outlet Box.
4. Make electrical connections: Connect grounding wire (green or bare copper) from the supply circuit to the green colored wire from the fixture. Connect the white wire(s) from the fixture to the white wire of the supply circuit. Connect the black wire(s) from the Fixture to the black or supply wire of the supply circuit. Use UL Listed wire connectors (by others). Secure wire connectors with UL Listed electrical tape (by others).
5. Screw the Assembly (B) onto the Back Plate (A)
8. Install the lamp.
8. Screw Cover (C) onto the Fixture (B)
9. Restore power.

IMPORTANT:

In order to comply with established electrical code, the installer must seal the area around the fixture base & the wall, with type of caulking compound such as GE 100% or Dow Corning 100% silicone to provide a watertight seal in accordance with the different surface textures of the wall.
